

Cloud Storage

Make a Storage Account

1. In the left pane click on Storage Accounts
2. Click on Add
3. Enter all the relevant fields and click on Create

The screenshot displays the Microsoft Azure portal interface for creating a storage account. The left-hand navigation pane shows the 'Storage accounts' option highlighted with a red box and the number 1. The main content area is titled 'Storage accounts' and includes an 'Add' button (marked with a red box and the number 2) and a list of existing storage accounts (currently empty). The right-hand pane shows the 'Create storage account' form, where the 'Name' field (marked with a red box and the number 3) is filled with 'storage123994'. Other fields like 'Deployment model' (set to 'Resource manager'), 'Account kind' (set to 'General purpose'), 'Performance' (set to 'Standard'), and 'Replication' (set to 'Read-access geo-redundant storage (RA-...)') are visible. At the bottom right, the 'Create' button is highlighted with a red box and a red arrow, with the text 'Automation options' next to it.

Create a Container

1. Click on *Container* and enter a unique name
2. You now have 3 options:
 - a. **Private access level:** only you can access and download the files stored
 - b. **Blob access level:** any user with the link to the Blob can access the files stored
 - c. **Container access level:** any user with the link to the container can access the files and Blobs in the container
